DETAILED ACTION

Page 2

Drawings

1. Figures 5 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Art Unit: 2816

Extensive mechanical and design details of apparatus should not be given.

3. The abstract of the disclosure is objected to because it is not in a single paragraph and the words are too close together. Correction is required. See MPEP § 608.01(b).

4. The disclosure is objected to because of the following informalities: the spacing of the words of the specification is such as to make reading/OCRing and entry of amendments difficult.

New application paper with cleared spaced between words is required.

Claim Objections

5. Claims 1-4 are objected to because of the following informalities: the spacing of the words of these claims is such as to make reading/OCRing and entry of amendments difficult.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed limitation that "value obtained by dividing the count value of the half cycle of the reference clock by the

Application/Control Number: 10/624,904

Art Unit: 2816

multiplication factor is defined as a multiple count value" in claim 1 is not enabled embodiment

Page 4

because with such limited structural limitation, as recited in the claims, it is not understood how

the instant invention can perform the claimed function such as how to obtain the multiple count

value. Furthermore, the claimed limitations that "inverts the output of the multiple clock output

each time it counts the multiple count value by the output clock of the ring oscillator" have not

been enabled in the specification. The details of such functions are not seen in the description of

the preferred embodiment. It is not clear as currently defined, how the instant invention can

perform that recited function.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for

failing to particularly point out and distinctly claim the subject matter which applicant regards as

the invention.

10. Claim 1 recites the limitation "the count value" in line 8. There is insufficient antecedent

basis for this limitation in the claim.

Claims 2-4 are rejected due to their dependencies on claim 1.

Conclusion

11. Regarding claims 1-4, the patentability thereof cannot be determined because of failing to

comply with the enablement requirement.

Application/Control Number: 10/624,904 Page 5

Art Unit: 2816

12. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. For example, Yamauchi et al. (US 5,789,985) is cited as of interest because it

discloses a Frequency multiplying device and digitally-controlled oscillator circuit.

13. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hai L. Nguyen whose telephone number is 571-272-1747 and

Right Fax number is 571-273-1747. The examiner can normally be reached on Monday-

Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Timothy Callahan can be reached on 571-272-1740. The official fax phone number

for the organization where this application or proceeding is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is 571-272-1562.
